Strongly support	1	0	0	0	0	0		2	1	1	1	4	1	1	1	1	1	1	1	1	1	1	Cycling from Haslingfield, the Grantchester route is the one I use least since the Busway opened. Getting into the town centre through the back streets from the station is more convenient than emerging on the Barton Road; otherwise, while I was commuting to the Science Park, going Barton-Coton-Histon Road-Busway spur better avoided congestion. My main concern with the Hauxton route are the points where the current bridleway sees use by heavy agricultural vehicles and gets deeply rutted (especially this tree-lined section – https://www.google.co.uk/maps/@52.1511003,0.0829275,167m/data=!3m1!1e3), even if the design includes a relief-track for these vehicles, continuing maintenance at crossing points at the very least needs to be a part of the budgeting. Since there seems to be no budget to clear the shared-use pavement from the Hauxton end of the bridleway to the Trumpington Meadows of the steady accumulation of leaf-litter or sand and gravel I'm not optimistic about the long-term usability.	With three villages starting "Ha" in a cluster, the proposed signage isn't perhaps the most unambiguous way of denoting the destination.	The M11 bridge with a wheel channel 'would of course still not be accessible for wheelchair use.
