

LANDSCAPE PROPOSALS

Landscape Strategy

A combination of trees, hedgerows and woodland to screen the site, including a minimum 20m wide buffer between the A10 and M11 and the site.

A minimum 30m wide buffer between the Trumpington Meadow Country Park and the carpark.

A drainage strategy combining sustainable urban drainage basins and swales, discharging into the existing field ditch.

The western-most field reserved to enhance local biodiversity, with trees and wildflower meadow. All planting specified to enhance local biodiversity.

The grassland around the carpark, to be a mix of wildflower meadow and amenity grassland.
